

ENGINEERING CONCEPTS, INC.

SURVEY FIELD CREW INSTRUMENT OPERATOR

Engineering Concepts, Incorporated is seeking a full time Survey Field Crew Instrument Operator for our Fincastle, VA office. Engineering Concepts, Inc. is an equal opportunity employer that specializes in Civil Engineering and Land Surveying, including services ranging from environmental engineering to land development, surveying, water and utility resources and assistance with economic development.

Duties and Responsibilities:

The following duties are typical of the position but are not all-encompassing.

1. Work as a member of a survey crew performing boundary, topography, ALTA, right of way, and construction surveys for public and private clients.
2. Set-up and operate survey equipment, including total-station, data-collector, level, and G.P.S.
3. Perform survey calculations
4. Perform all aspects of stakeout and location surveys using applicable survey equipment.
5. Maintain survey equipment used and keep survey truck stocked with necessary supplies and tools
6. Research existing record information, including record maps, plans, deeds, easements, and right-of-way documents; and maintains field data records, survey project files, and indexing systems.
7. May perform mapping compliance or other related office survey duties as a temporary assignment in order to satisfy the training/experience requirement for the Professional Land Surveyor's License.
8. Perform a variety of routine tasks, which are intended to provide experience and interaction with higher-level staff, methods, practices, programs and culture of the company.
9. Provide support to the project team in all aspects of surveying production.
10. Responsible for efficient, accurate, and complete information documentation.
11. Ability to assist in office surveying tasks.
12. Other duties as assigned.

Qualified applicants are expected to help out in whatever duties are required to deliver a quality product on schedule.

Education/Experience:

A valid Driver's License and a High School Degree or GED is required. A Technical or Associates Degree in Surveying/Civil Engineering, related field or an individual in the process of pursuing a degree is a plus.
